FULL STACK WEB DEVELOPER & QA ENGINEER

Front-End Web Developer leveraging experience in QA to build a more coherent user experience on the web. Known as a critical thinker when developing apps, with a focus on web development. Advocate for the user-experience for each project. Applied aspects of QA and agile development on various teams where I worked with Developers, Product Managers and other QA colleagues to deliver new user-focused features on time. Driven to hone skills in the future as a web developer to deliver more engaging user experiences on the web.

TECHNICAL SKILLS

Languages: SQL, HTML/CSS, JavaScript, CSS, CSS3, HTML5, JSON

Database: MySQL, MongoDB, Firebase

Other: Heroku, Git, Bash, Microsoft Office Suite, JIRA, TFS, FogBugz, HP Quality Center, Bootstrap, Materialize CSS

PROJECTS

Youtify - kylafitzpatrick.github.io/Youtify/ | github.com/KylaFitzpatrick/Youtify

Full-stack web app that allows user to vote on their favorite song or video

- Worked with a team of four in creating a full-stack web app that uses Spotify API and YouTube API to display songs and videos users can vote on.
- Tools used: HTML5, CSS3, JavaScript, jQuery, Firebase, Spotify API, Bootstrap, YouTube API

WordGuess - kylafitzpatrick.github.io/Word-Guess/ | github.com/KylaFitzpatrick/Word-Guess

Web app that generates a random animal word

- Built a word guess app game that allows users to guess a randomly selected animal name and if the user guesses the animal correctly a YouTube video of the animal displays.
- Tools used: HTML5, CSS3, and JavaScript

SF Scraper - sf-scraper.herokuapp.com | github.com/KylaFitzpatrick/SF_Scraper

Full-stack web app that scrapes the SF Chronicle for news articles

- Designed an app that allows users to scrape articles from the SF Chronicle so they can save articles as well as attach notes to the saved articles
 - Tools used: Node.JS, Express, MongoDB, HTML5, CSS, Materialize CSS, JavaScript, jQuery, and Handlebars
-
